

Nexus — The App Store for AI Capabilities

Nexus — The App Store for AI Capabilities

- ✓ For users: Discover and use AI superpowers from your phone
- ✓ For developers: Finally monetize your AI tools from day 1
- ✓ For enterprises: Access AI workflows anywhere, not just desktops

Mobile-first • Monetization Planned • Cross-platform compatible

The AI Tool Distribution Crisis

Proven Market, Broken Monetization

The numbers tell a compelling story: ChatGPT's Custom GPT Store has thousands of AI tools with massive engagement - some reaching 100,000+ ratings and 50+ million conversations.

Yet despite this impressive traction, developer earnings remain at \$0.

The Reality

Discovery Fragmented

Users search through Reddit posts, GitHub repositories, and Twitter threads to find tools

Setup Broken

JSON configurations, terminal commands, and desktop-only interfaces create barriers

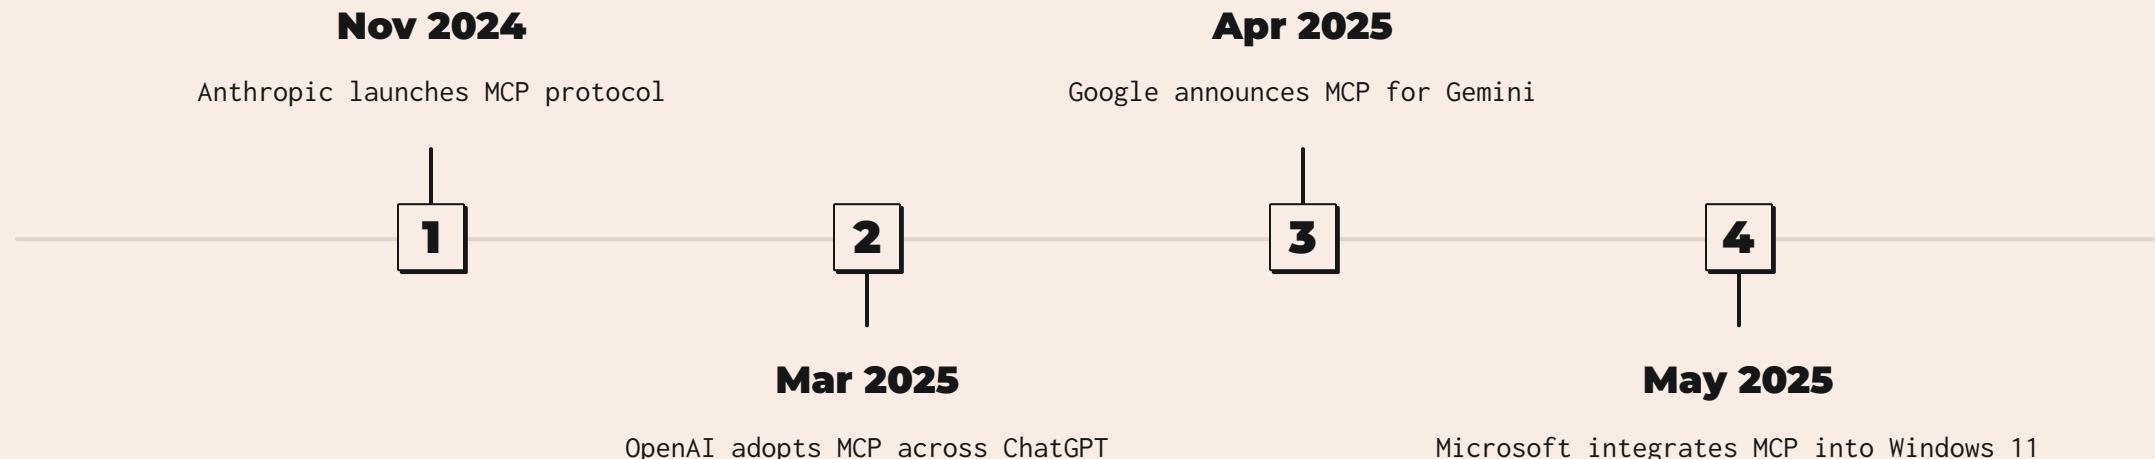

No Monetization

OpenAI promised payments in Q1 2024, but developers are still waiting

High-quality AI tools die while basic chatbots with marketing succeed

Perfect Timing Convergence

Universal AI Standard Finally Emerging

All major AI companies now use the same "USB-C for AI tools," creating a standard infrastructure for the first time.

Mobile AI Demand Exploding

- Mobile AI app revenue: **\$4.5B in 2024 (+130% YoY)**
- AI smartphone penetration: **33% by end of 2025**
- Users want AI that **does things**, not just chats

Developer Frustration at Breaking Point

- Thousands of frustrated Custom GPT creators earning nothing
- Proven AI building skills but zero monetization options
- Ready to migrate to platforms offering real revenue

Nexus: Complete Mobile AI Ecosystem

True Marketplace

Curated AI tools with ratings, reviews, and easy discovery

One-Tap Installation

No JSON configs, terminal commands, or technical setup

Enterprise-Ready Security

OAuth, Secure token handling built-in

Unified Chat Interface

Use any installed AI tool from single mobile conversation

Monetization (Planned)

Developers earn immediately with automatic payouts

Onboarding (Planned)

Built-in capabilities (memory, reminders, calendar) so users see value instantly

Live Demo: What Competitors Are Missing

Part 1: Mobile Commerce Revolution

"While others focus on developer productivity, we've unlocked something bigger..."

- Open Nexus → "Install Minimalist Skincare"**
- One-tap OAuth → Automatic configuration**
- In chat: "Show me vitamin C serums under ₹500"**
- Browse products → "Add the 20ml bottle to cart"**

Part 2: Developer Apps

1. Install Cloudflare → One tap
2. One-Tap OAuth → Auto Config
3. Check Traffic : "Check traffic on my website" → Done

Part 3: Enterprise Productivity

1. Install Asana → One tap
2. One-Tap OAuth → Auto Config
3. Create bug report: "Remind to Triage Iphone bug tomorrow 11 AM" → Done

Same interface, different capability

Our Secret GTM Advantage

Target 1: Frustrated Custom GPT Creators

- Thousands of proven AI builders with 100K+ user ratings signalling millions of installs.
- 50+ million conversations generated but ₹0 earned
- Ready to migrate for real monetization opportunity
- Proven track record of building engaging AI experiences

Expansion Targets

GitHub MCP developers

5,000+ existing servers ready to monetize

Enterprise partnerships

Shopify, Stripe, Atlassian integrations

AI developer communities

Discord, Reddit, Twitter outreach

"Has anyone made money from GPTs? Developers aren't seeing revenue despite demand."

– [ChatGPT Forum](#)

"I really want the GPT Store to succeed, but at the moment, it isn't: What I'm missing is..."

– [Reddit](#)

Migration Strategy

01

Direct outreach to high-engagement GPT creators

02

Technical migration support - convert GPT concepts to MCP

03

Early adopter incentives - better revenue share initially

Market Validation

\$12.1B

Consumer AI Market in 2025

Projected market size, indicating strong user demand.

\$2.4B

Specialized Tools Segment

Portion of the consumer AI market focused on niche applications.

30%

AI Market CAGR

Consistent annual growth rate across the broader AI industry.

3.5%

Freemium Conversion Rate

**Ad Placement &
Featured Tools**

\$10M

Premium Developer Tiers

Total: \$30 Million USD

Revenue Streams

Primary: App Store Model

Graduated take rate: 10-30% based on developer earnings

Example: Developer earning ₹10L keeps ₹8.5L monthly

Secondary (Scale Phase):

- Premium placement for featured tools
- Pro analytics for developers
- Enterprise private marketplaces

Competitive Positioning

Category	Examples	Strength	Critical Limitation
Custom GPT Store	ChatGPT Store	Proven demand	₹0 developer earnings
Desktop MCP	Claude Desktop, Cursor	Great dev tools	No mobile, no monetization
Mobile AI Limited	Claude Mobile, ChatGPT	Good chat UX	15-25 tools, \$20/month paywall
 Nexus	Us	Mobile marketplace + monetization	100+ tools, freemium model

Our Unique Position

Only mobile MCP marketplace

With real monetization

Frustrated developer migration

Ready-made opportunity

Mobile commerce focus

Competitors ignore e-commerce

Production Platform + Clear Path Forward

Current Traction

100+ AI tools integrated

50 productivity + 50 Shopify stores

Mobile app built

Deployed to mobile via Capacitor

OAuth authentication

Working across major platforms

25+ beta users

With positive engagement signals

Technical Priorities

1. Native development
2. Payment infrastructure
3. Automated marketplace
4. Enterprise security

Technical Evolution Path

- **Current:** Web app + mobile (rapid validation approach)
- **Next 6 months:** Native Kotlin/Swift development using official MCP SDKs
- **Why this works:** Proven concept first, then production infrastructure

1

Q1

Native Android & iOS App automated developer onboarding, 250+ users

2

Q2

Monetization live, 500+ users, first developer payouts

3

Q3

Custom MCP Servers, 750+ users, ₹2L+ monthly GMV

4

Q4

Enterprise Onboarding, 1,000+ DAU, ₹5L+ monthly GMV.
